This Risk Warning and Disclosure Policy (the "Policy") constitutes a legally binding disclosure document and forms an integral part of the Company's contractual framework with its clients.

---

## 2. PURPOSE AND REGULATORY OBJECTIVE

The purpose of this Policy is to:

- Provide clear, fair, and non-misleading disclosure of the material risks associated with Forex and CFD trading;
- Ensure that clients are able to make informed investment decisions;
- Fulfil the Company's disclosure obligations under Mauritius law and FSC conduct of business requirements.

This Policy applies to all clients, prospective clients, and users of the Company's platforms, services, and communications.

---

### **3. GENERAL RISK WARNING**

Trading in Foreign Exchange (Forex) and Contracts for Difference (CFDs) involves a high level of risk and may not be suitable for all investors.

Clients expressly acknowledge that:

- Trading Forex and CFDs is speculative in nature;
- Past performance is not a reliable indicator of future results;
- It is possible to lose part or all of the capital invested;
- In leveraged transactions, losses may exceed the amount of funds deposited.

Clients should only trade with funds they can afford to lose.

---

### **4. LEVERAGE AND MARGIN RISK**

Forex and CFD products are traded on margin and involve leverage. Leverage magnifies market exposure and may significantly increase both potential gains and potential losses.

Clients acknowledge that:

- Small price movements may result in substantial losses;
  - Margin calls may be issued requiring additional funds at short notice;
  - Failure to meet margin requirements may result in forced liquidation of positions without prior notice;
  - Negative market movements may lead to losses exceeding deposited funds, where permitted by law.
- 

### **5. MARKET AND PRICE VOLATILITY RISK**

Forex markets are subject to rapid price fluctuations due to:

- Economic indicators;
- Interest rate changes;
- Political or geopolitical events;
- Central bank interventions;
- Market sentiment and liquidity conditions.

Such volatility may result in orders being executed at prices materially different from expected levels, including slippage and gaps.

---

## **6. LIQUIDITY AND EXECUTION RISK**

Under certain market conditions, liquidity may be reduced, resulting in:

- Delays in execution;
- Inability to close positions at desired prices;
- Execution at less favorable prices.

The Company does not guarantee continuous liquidity or execution at specific prices.

---

## **7. TECHNOLOGY AND OPERATIONAL RISK**

Trading through electronic platforms involves inherent risks, including but not limited to:

- System failures or outages;
- Internet connectivity disruptions;
- Cybersecurity incidents;
- Delays in order transmission or execution.

The Company shall not be liable for losses resulting from such events except where required by applicable law.

---

## **8. CURRENCY AND CROSS-BORDER RISK**

Where trading instruments or accounts are denominated in foreign currencies, clients are exposed to exchange rate fluctuations that may affect profits, losses, and account balances.

---

Cross-border regulatory, political, or economic changes may also impact market conditions and trading outcomes.

---

## **9.NO ADVICE AND NO GUARANTEE**

Unless expressly agreed in writing:

- The Company does not provide investment, legal, tax, or accounting advice;
- Any market commentary, analysis, or information provided is general in nature and does not constitute a recommendation or solicitation;
- No guarantee is provided regarding profits, returns, or capital preservation.
